Platforms & Languages: AWS, Azure, SQL Server, Power Platform, Tableau, Snowflake, SAS, Python, Javascript, SQL, R, C#, Fabric, Power BI, Excel, Office

EMPLOYMENT HISTORY

Director of Data Products, NaphCare LLC, Birmingham AL, Feb 2022 – Present

- Led the development and launch of TechCareBI, a Business Intelligence product integrated into our .NET EMR software, bringing modern data warehousing, AI insights, ETL pipelines, and UX optimization to internal and external stakeholders.
- Partnered with executives and business leaders to define product strategy, translate business requirements into technical specifications, and establish market positioning and go-to-market frameworks.
- Collaborated with legal, compliance, and proposal teams to strengthen bid submissions and present flagship features for RFP, directly contributing to award of 9-figure contracts.
- Instituted data quality standards and automated validation checks, reducing operational risk, lowering support workloads up to 100%, and improving client satisfaction.
- Presented company solutions at major national conferences, demonstrating AI platform capabilities, data visualizations, outcomes-driven analytics, and statistical studies, boosting brand visibility and stakeholder engagement.
- Oversee the integration and auditing of AI and machine learning deployments, establishing a library of scripts and prompts for generative AI testing to evaluate internal control design and risk for reporting workloads.

Director of Operations, SP Test Prep, Holbrook NY, Sep 2016 – Jan 2023

- Built and scaled a successful edtech startup through strong brand positioning, marketing strategy, and data-driven decision making.
- Deployed a custom SQL Server-based CRM on .NET with analytics-ready schema design, enabling downstream BI modeling of leads, enrollments, revenue, and contractor utilization.
- Leveraged digital marketing analytics, SEO data, and customer segmentation to expand brand reach and sustain year-over-year revenue growth.
- Managed all business operations, including finance, recruitment, and CRM, implementing data-informed operational processes to optimize resource allocation and customer satisfaction.

Operations Analyst, Universal Health and Rehab, Islip, NY, Apr 2011 – Aug 2015

- Engineered SQL Views, Server Agent workflows, and PowerQuery transformations to simplify and automate reporting for non-technical staff and leadership, allowing them to pull cleaned data into Excel via ODBC connections.
- Designed high-leverage, executive-facing reports that tracked key metrics related to patient progress, churn, and claims.
- Worked directly with patients and providers to gather holistic longitudinal data, translating it into measurable insights for the design and evaluation of individualized improvement programs.
- Collaborated with multidisciplinary teams to align program outcomes with organizational objectives, reduce operational delays, and enhance administrative performance.
